

# Viktor Krlevski

Technical and functional consultant

With almost 20 years of industry experience in finance software as well as general ERP software, I have moved from developer to technical and functional architecture and consultancy levels. I have handled complete software system architectures and the implementation of end-to-end projects. Expertise in AX vertical solutions, D365 FO, Power Platform, and functional-technical consultancy for software development services. Deeply experienced in solutions within client-facing roles, conducting technical and business analysis, managing relationships with stakeholders, Dynamics integration with finance system implementations, data migrations, cross-training end-users and technical users, presentations, and production of proof of concept. Worked with business leaders to improve architecture and future-proof systems.

## Experience

---

03.2019 to date | 42Dynamics, Skopje
