PROFESSIONAL EXPERIENCE

09/2021 – 02/2022

UK, remote

Calero-MDSL

Product Management Consultant

Responsibilities:

- Built Unified Communications as a Service (UCaaS) product in the introduction phase that provides visibility, optimization, and overall technology expense management
- Executed the product strategy by turning it into a roadmap
- Created and communicated clear goals and priorities
- Collaborated with sales and marketing to reduce friction and spread understanding of the product capabilities and value

02/2020 – 08/2021

UK

Toyota Connected Europe

Delivery Management Consultant

Responsibilities:

- Led two globally distributed backend data development teams building microservice architecture IoT solutions to collect, process, enrich vehicle data and APIs to make it available for car owners in Europe and Russia and to generate highly relevant sales leads
- Managed the product backlog and prioritized backlog items according to business goals
- Planned and ran high level requirement workshops and documented solution architecture
- Facilitated requirement refinement, estimation, sprint planning and retrospective sessions
- Introduced team morale boosting and trust building video demos
- Analyzed interface specifications
- Coached the team in Scrum and helped resolving roadblocks
- Iteratively improved processes and working practices to deliver faster
- Created project health reporting and forecasting
- Liaised with many stakeholders and vendors within and outside of Toyota group

01/2017 – 11/2019

UK

Trainline

Product Owner / Senior Business Analyst

Responsibilities:

- An all-encompassing role as part of the leadership team for the web development squads (30+ developers) delivering a major re-

platforming program transitioning the previous monolith system into microservices architecture

- PCI compliance re-certification and increased application security
- Re-platformed web booking flow for trainline to enable serving UK and International offers
- from 220 rail and coach carriers on a Single Global Platform
- Facilitated requirement refinement, estimation, sprint planning and retrospective sessions
- Created a bespoke release burndown chart to support resourcing, scope decisions and
- communicate on progress
- Liaised daily with backend teams to make sure their backlog priorities supported achieving
- frontend milestones without disrupting dependencies
- Carried out extensive 'as is' analysis on the legacy UK and EU websites
- Writing and quality assuring epics and user stories using BDD approach
- Problem-solving throughout discovery sessions, workshops and 3 amigos sessions
- Setup custom JIRA workflows, fields, boards, migrated projects, JIRA training for the team
- Spoke at the internal tech summit about my successful requirement analysis approach

02/2015 – 12/2016
UK

Gullivers Travel Associates
Technical Product Owner

Responsibilities:

- Lead a team of 4 developers, 2 QAs to deliver new & improved forecasting algorithms and calculations of a bespoke revenue management system
- Established and was responsible for the day-to-day operations of the agile delivery processes, tools, and reporting for the delivery team
- Defined requirements as user stories
- Facilitated grooming, estimation, sprint planning, retrospective, and demo sessions
- Handled escalations, additional service, and resource requests

08/2014 – 10/2014
Hungary

Affinitext
